

Land Surveying Services for the Illinois Department of Transportation

Client

Illinois Department of
Transportation
District One Land Acquisition

Scope of Services

Boundary Survey
Right-of-Way Determination
Statutory Plat of Highways
Legal Descriptions for
Conveyances

This current Manhard Consulting project includes field boundary surveys for approximately 1,500 acres of unsubdivided land, right-of-way determination for approximately four miles of Interstate 55

and the preparation of a statutory plat of highways and legal descriptions for land conveyances for road widening and interchange improvements.

This project required special attention to safety issues for field crews working along Interstate 55 and on adjacent industrial properties. The crews were provided special safety training to allow access to the various properties. The project was successfully completed within the time frames mandated by the Illinois Department of Transportation.

Manhard Consulting has been providing land-surveying services for the Illinois Department of Transportation for over ten years. The various projects have included field boundary surveys for approximately 5,000 acres of subdivided and unsubdivided land; Right-of-Way determination for approximately 25 miles of state highways; Installation of monuments marking the new Right-of-Way; Restoration of section corner monuments; Preparation of statutory plats of highway and legal descriptions for land conveyances. These services have been provided for various road widening and road construction projects throughout northeastern Illinois.
