Highland Park, IL

## **Client**

Legat Architects

## **Scope of Services**

Synthetic Turf Investigation

Final Engineering

Stormwater System Design

Construction Assistance

Permitting Assistance

Agency Coordination

## **Project Completion**

2002

The renovation of the Highland Park High School track and field facilities and football field included multiple components. Manhard Consulting provided design services for the widening and extension of the existing track in accordance with IHSA standards, regrading and resodding of the football field, the installation of an improved drainage system between the track and football field, and the extension of a water service to the existing concession stand. Assistance was also provided in the evaluation of contractor bids and the administration of the site construction.
