Right Size, Right Priority

We're not the biggest firm in the nation, nor are we the smallest. At Manhard Consulting, our goal is to be right-sized: small enough to get deeply involved in our customers' projects, large enough to deliver any engineering services on any size project, anywhere in the U.S.

It's a balance that we've perfected through decades of careful growth.

Since 1972, we've added staff, disciplines and office locations, always with the goal of improving our ability to deliver the exact services our customers need, when and where they need them. That's our top priority, and it always will be.

Manhard Consulting delivers end-to-end engineering services to residential, commercial, business/industrial, institutional and recreational developers and local, state and federal agencies. Services are available nationwide.

Civil Engineering Services

Civil Engineering Services

*It's not just what we deliver,
but how we deliver.*

*With Manhard you get
end-to-end engineering
services, and an eye-to-eye
commitment to achieving your
specific goals and objectives.
Whatever it takes.*

Any Project, Anywhere

Resources run deep at Manhard Consulting. Our multi-disciplinary team can help with everything from finding property to conducting due diligence to delivering preliminary and final engineering plans, services and plats. Manhard projects have been completed for residential, commercial, industrial, governmental, educational, institutional and recreational clients across the nation. Our client list is currently over 6,000 strong and includes some of the most recognizable names in American industry.

A Culture of Accountability

At Manhard we own the final outcome as much as you do. Our reputation is riding on it. So we move quickly to prepare plans, obtain permits and bids, locate materials, and resolve problems early. We work closely with governmental agencies to cut through red tape and eliminate delays. We take into account deadlines, budgets, community and environmental concerns, administrative issues, and state and local regulations and policies. This hands-on approach is a Manhard hallmark. We make it our business to understand your goals, adopt them as our own, and do what it takes to get the best result.

Decades of Experience

When you work with Manhard you're working with veteran engineers, many of whom are recognized industrywide as leaders in their fields. Our team knows how to solve problems and get things done. They bring a multi-disciplinary mindset to every project, and leverage complementary skills across the Manhard network to cut costs, eliminate bottlenecks, and ensure that all technical and aesthetic elements are in balance.

Engineering with Attitude

Why work with Manhard? Because attitude matters. In fact, it's our defining characteristic. At Manhard you'll find people who love a challenge, who find a way, who don't stop digging until they get answers. Our team does whatever it takes to meet your specific goals and get an outcome that everyone can be proud of. That attitude, more than anything else, defines this company and sets it apart.

Whatever It Takes

The nationwide Manhard network includes offices in the Midwest, Rocky Mountain West, desert Southwest and Southeastern U.S. Wherever you work with a Manhard team, you get the same service, commitment and attention to detail that has defined our company since 1972. Please call us or go online today, and learn how our team can move your project along the fastest, most direct path from concept to completion.

Manhard provides end-to-end engineering services for some of the biggest names in residential, commercial and industrial property development in the U.S. Services are available from conceptual planning through construction for any size project.

Manhard projects strive to achieve perfect balance among all technical, aesthetic, economic and practical considerations, and the end result shows it.

Manhard teams have access to the entire multi-disciplinary Manhard network. Engineers and specialists across a variety of disciplines are available to solve problems and ensure the technical integrity of every project.
