Construction Staking

Construction Assistance

Permitting Assistance

Agency Coordination

The Volo Municipal site consists of 42-acres containing approximately 12-acres of wetlands and 19-acres of floodplain area. Site improvements included a 15,500 sf municipal building, a 150 space parking lot, urban bike path extensions, recreational fields, and preserved wetlands. Responsibilities included final engineering, preparation of cost estimates, stormwater analysis, and coordination with Lake County Stormwater Management Commission, Lake County Forest Preserve and the Army Corps of Engineers. Construction on this project is still ongoing with Manhard Consulting, Ltd. continuing to provide excellent service to the Village of Volo.
