

LEED® Engineering Services

## Building a Sustainable Future

The LEED® accredited professionals at Manhard Consulting have a thorough understanding of sustainable green building and development practices and can assist you in seeking LEED certification. Our experienced staff is part of your team, and can help you understand the performance standards set forth in the LEED Rating System. We can help you determine what products and design are most appropriate for achieving credits within each rating category.

### Supported Services

**LEED for New Construction and Major Renovation** is designed to guide and distinguish high-performance commercial and institutional projects.

**LEED for Existing Buildings: Operations & Maintenance** provides a benchmark for building owners and operators to measure operations, improvements and maintenance.

**LEED for Core & Shell** aids designers, builders, developers and new building owners in implementing sustainable design for new core and shell construction.

**LEED for Schools** recognizes the unique nature of the design and construction of K-12 schools and addresses the specific needs of school spaces.

**LEED for Retail** recognizes the unique nature of retail design and construction projects, and addresses the specific needs of retail spaces.

**LEED for Healthcare** promotes sustainable planning, design and construction for high-performance healthcare facilities.

**LEED for Homes** promotes the design and construction of high-performance green homes.

**LEED for Neighborhood Development** integrates the principles of smart growth, urbanism and green building into the first national program for neighborhood design.

### Areas of Focus Within the LEED Rating System

The LEED (Leadership in Energy and Environmental Design) Green Building Rating System™ is a national benchmark for design, construction and operation of sustainable green buildings and developments. With Manhard Consulting as part of your “green team,” you’ll get an experienced team member who can address the site design and development aspects of the LEED standard.
